3rd ASEAN SAGO SYMPOSIUM 2016

“Enhancing sago potential for application in research and industry”

First Announcement

25 – 26 October 2016
Dewan Tunku Abdul Rahman Putra
Universiti Malaysia Sarawak
94300 Kota Samarahan
SARAWAK, MALAYSIA

INTRODUCTION

Sago palm (*Metroxylon* spp.) is one of the major crops that contributes significantly to the economy of ASEAN. The plant capable of surviving in the tropical lowland and peat swamp forests found in SEA such as Sarawak in Malaysia Papua New Guinea, Philippines, Indonesia and Thailand.

Metroxylon sagu Rottb. is reported as one of the **highest starch yielding crops** and has been exploited intensively for **agricultural plantation, and industrial utilization**. Besides starch being the main product, it is also converted to other materials in downstream processing, and various other ways including furniture and fertilizers.

The 1st and 2nd ASEAN Sago Symposium were organized by Faculty of Resource Science and Technology (FRST), Universiti Malaysia Sarawak was a successful event and we would like to invite you again to participate in this symposium, which is aimed at highlighting the research and developments on sago palm and its derivatives. **ASAS 2016**, the 2-day symposium will be the best platform to present current projects, findings, ideas and inventions related to sago palm plantation and subsequent utilization.

Symposium Scope:

- Waste Management and Starch Utilization ●
- Agronomy and Agriculture Sciences ●
- Microbiology and Molecular Biology ●
- Economy and Social Studies ●
- Sago Starch Chemistry ●
- Biotechnology ●
- Others Related ●

WHO SHOULD ATTEND

NGOs	Foresters	Scientists	Researchers
Academicians		Conservationists	
Graduate Students		Sago Plantation Managers	
Environmental Consultants		Environmental Policy Makers	
Science & Technology Policy Makers			

Leading suppliers of equipment and scientific products will be invited to exhibit their products and provide researchers with an opportunity to get the latest information on technical and scientific equipment.

SCIENTIFIC PROGRAMME

The programme includes plenary sessions, oral and posters presentation. Eminent scientists in the field of sago research studies from local and ASEAN countries will be invited to deliver plenary lectures.

INSTRUCTION TO AUTHORS

Intending authors are invited to submit abstract (in MS Word format) on topics within the scope of the symposium either as oral or poster presentations (in English). Posters should be in A1 size. Guideline for presentations can be downloaded from our website below. Please submit your abstract online via email to 3rdASAS2016@gmail.com
